## ARTIFICIAL INTELLIGENCE IN CLINICAL RESEARCH - SCOPE, COMPLIANCE & INTEGRATION

Virtual Presentation by:

Dr. Sanjeev Kumar, CEO CareFrame  
and

Trent Katz, CEO VP, GTM & Client Success

### Objectives:

1. Scope: Identify where AI can reduce manual work in clinical research, from data intake and cohort review to monitoring, abstraction, and reporting.
2. Compliance: Understand how AI use accounts for PHI, consent, audit trails, validation, bias, and human review.
3. Integration: Plan how AI can fit into existing EHR, registry, IRB, study team, and sponsor workflows without disrupting research operations.
